

Conditions

NEXT-LEVEL COMMUNICATION
FOR YOUR COURSE

Conditions is a revolutionary and complete software platform that provides everything you need to instantly communicate with your golfers in real-time about the daily status of the golf course, and ensures they are actually getting the notes. It comes with a turn-key app, CMS and Resource Library fully built-out for you.

Conditions is very easy to use, we did all the hard work to make communicating with your golfers a breeze.

HOW DOES IT WORK?

Conditions provides a free app for golfers via the App Store or Google Play. Once installed, the app can "alert" them via push notifications about important course notes for the day from the Superintendent and they can browse other areas of the course as well. You can even target the notification by using simple drag & drop "geo-fencing" when they reach a certain area on the course for the alert to appear on their device.

The Superintendent is provided with a very easy-to-use CMS (Content Management System) where they can update anything about the course status at any time. We deliver a turn-key setup for updates to be made on a hole-by-hole basis and overall, it's as easy as writing a text or tweet. It guarantees the vast majority of golfers are in-the-know about the course as they play due to the app and its notification system.

- Resource Library for great content ideas
- Push Notifications keep golfers engaged
- Geo-Fence areas for specific alerts or notes
- Promote your professional image easily
- Create Polls for feedback at the best time
- You decide who is allowed access to start
- Extremely easy to use, world-class service
- \$1,495 setup/training, \$499/year for use
