

Hole Locations Made Super Easy

ezPins is the creation of two industry leaders in golf course technology, ezLocator and Playbooks for Golf. The value-minded customer can have many of the same features previously only available in the ezLocator software. Minimize pin placement mistakes and offer more choices to players.

- Eliminates placement errors and guesswork
- Isolates areas for agronomy purposes
- Allows review of historical hole locations
- Adapts hole locations for wet/dry weather
- Includes Tour-quality pin sheets, Mobile App
- Generates consistent advertising revenue
- Adapts for tournament play & special pins
- Creates 7 days of pins in under 15 minutes

How It Works

Hole locations are generated by the Superintendent. After each position has been determined, we provide precise instructions on how to get to this exact location on the greens and cut holes. The golf shop can then print pin sheets or input data into GPS cart systems. The ePinsheet mobile app automatically shows each pin location.

Pricing & Setup

Because we don't need to visit your course, it is very easy to get started at an affordable price of only \$1,895. And setup is quick – we provide you with a custom Setup and Field Guide that directs you through the entire process. You can easily configure ezPins, set your generation rules and begin using it right away. It all works on PC and Mac and is synced between all users.

Pin Sheets & Ads

There are so many ways to customize the pin sheets for your custom look. You can quickly and easily switch between general and tournament play, even creating special events pin sheets months in advance to save locations for these times. Add in the ability to insert ads and corporate logos, and you'll see how ezPins can drive revenue to your club.
